FEATURED PROJECTS

Emo Planet
Designed an interactive toy
system that helps children
recognize and express emotions
through play, sensory interaction,
and storytelling.

EXPERIENCE

Product Design Student
ArtCenter College of Design

- Developed product concepts through user research, sketching, CAD modeling, prototyping, and final presentations.
- Produced appearance models and functional prototypes using digital and physical fabrication techniques.
- Applied ergonomics, material selection, form development, and manufacturing considerations throughout the design process.
- Presented projects through process documentation, presentation boards, and exhibition-quality models.

PROFILE

Product Design student passionate about children's products, toy design, and emotional design. Experienced in developing products from research and concept generation to CAD modeling, prototyping, and presentation. Dedicated to creating thoughtful, user-centered products that combine functionality, creativity, and meaningful user experiences.

AWARDS

- Merit-Based Scholarship, ArtCenter College of Design
- Best Craftsmanship Award, ArtCenter College of Design
- Selected Student Work, ArtCenter Exhibitions
